

The wireframe illustrates the mobile view of the Virtual Cookboox application, divided into three main sections:

- Header:** A banner featuring a variety of colorful vegetables (tomatoes, bell peppers, onions, etc.) with the brand name "Virtual Cookboox" at the top left and "LOGIN" and "Sign Up" buttons at the top right.
- Register Screen:** A modal window titled "Register" containing fields for "New Username" and "Enter Password". It includes a "Click X to return to homepage" link, a "Already Registered? Click [here](#)" link, and a "Submit >" button.
- Login Screen:** A modal window titled "Login" containing fields for "Enter Username" and "Enter Password". It includes a "Click X to return to homepage" link, a "Not Registered? Click [here](#)" link, and a "Submit >" button.
- Footer:** A section titled "Loaction" with a handwritten note. Below it is a "Stay Connected" section with handwritten notes and icons for GitHub, LinkedIn, and LinkedIn. At the bottom is a "Contact" section with a handwritten note.

Website Designer (Handwritten note)

Notes:

- User to use function buttons on navbar to either register or log onto Virtual Cookboox
- The wireframe is 2 screen views rolled into 1 page for illustration purposes only
- Upon successful completion of the data entry requirements, the user will click through either a register or login data collection template leading to formal submit
- Governance has been set on user data entry requirements
 - No data entry is red flagged to user
 - To register, the user has to provide a unique username and password
 - If user already registered, then they click on 'here' link to move to user login page
 - To login, the user has to provide the exact username and password they entered when registering
 - Upon successful completion of register or login, the user will proceed to homepage of virtual cookboox
 - User has access to the X button in top right corner that will take them direct to website homepage, but with restricted access to virtual cookboox
 - Homepage can also be accessed by clicking the navbar brand 'Virtual Cookboox', but scale of access to Virtual Cookboox will be determined by user login status
- Both total recipe count and favourite count are hidden in mobile view
- 'Footer' section to include social media references, contact information and reference to website designer

Notes:

- Navbar, 'Add Recipe' button, My Recipes and logout functions can be accessed by the logged in user. Front page image and footer copied through from home page
- Users logged out will see a reduced navbar with login and sign up buttons only
 - Recipe count & Favourite count information is hidden from the Navbar in mobile view
- User will be presented with 6 food genre images.
- Clicking on a food genre image will navigate the User to a dedicated food genre.html page to view available recipes, in summary format
 - Meat
 - Poultry
 - Fish
 - Vegetables
 - Grains
 - Pasta
- Home icon 'Virtual Cookboo' will take the user back to the 'home page', when clicked
- 'Add Recipe' button allows the Logged in User to key in new recipe details & upload an image of their chosen meal
- 'About' section sets out the purpose of the 'Virtual Cookboo' website and also includes reference to user stories too
- 'Footer' section to include social media references, contact information and reference to website designer

Navbar is shown when user has logged in

The screenshot shows the homepage of the 'Virtual Cookboox' website. At the top, there is a navigation bar with the following elements: a 'Virtual Cookboox' button, a 'Recipes 40' button, a 'Favourites 8' button, and a dropdown menu with 'LOGOUT', 'My Recipes', and 'Add Recipe' options. Below the navbar is a banner featuring a variety of colorful vegetables like bell peppers and tomatoes. Underneath the banner, the word 'Portfolio' is displayed. A search bar with the placeholder 'Search Recipe ...' is present. Below the search bar are six food genre categories arranged in a 3x2 grid: 'Meat' (with an image of steaks), 'Poultry' (with an image of a roasted chicken), 'Fish' (with an image of fish), 'Vegetables' (with an image of various vegetables), 'Grains' (with an image of different grains), and 'Pasta' (with an image of spiral pasta). At the bottom of the page, there is an 'About' section with two rows of social media icons (Facebook, Twitter, Instagram, YouTube, LinkedIn, GitHub) and a footer with 'Location', 'Stay Connected', and 'Contact' buttons.

Navbar is shown when user has not logged in

The screenshot shows the homepage of the 'Virtual Cookboox' website for a user who is not logged in. The navigation bar is simplified, containing only the 'Virtual Cookboox' button, a 'Recipes 40' button, a 'Favourites 8' button, and two buttons for 'LOGIN' and 'Sign Up'.

Notes:

- Navbar, 'Add Recipe' button, My Recipes and logout functions can be accessed by the logged in user. Front pager image and footer copied through from home page
- Users logged out will see a reduced navbar with login and sign up buttons only
- Recipe count & Favourite count created through python route decorators in the flask application with data being sourced from MongoDB database
- User will be presented with 6 food genre images.
 - Meat
 - Poultry
 - Fish
 - Vegetables
 - Grains
 - Pasta
- Home icon 'Virtual Cookboox' will take the user back to the 'home page', when clicked
- 'Add Recipe' button allows the User to key in new recipe details & upload an image of their chosen meal
- 'About' section sets out the purpose of the 'Virtual Cookboox' website and also includes reference to user stories too
- 'Footer' section to include social media references, contact information and reference to website designer

Navbar is shown when user has logged in

The screenshot shows the top navigation bar for a logged-in user. It includes a 'Virtual Cookboox' logo, 'Logout' and 'My Recipes' buttons, and an 'Add Recipe' button.

Portfolio

A search bar labeled 'Search Recipe ...' is positioned above six food genre categories:

- Meat**: Shows raw meat strips.
- Poultry**: Shows a roasted chicken.
- Fish**: Shows raw fish fillets.
- Vegetables**: Shows a variety of fresh vegetables.
- Grains**: Shows various types of grains and cereals.
- Pasta**: Shows a variety of colorful pasta shapes.

About

The 'About' section contains two hand-drawn style paragraphs. Below it are three footer links: 'Loaction', 'Stay Connected', and 'Contact'.

Stay Connected

Social media icons for GitHub and LinkedIn are displayed.

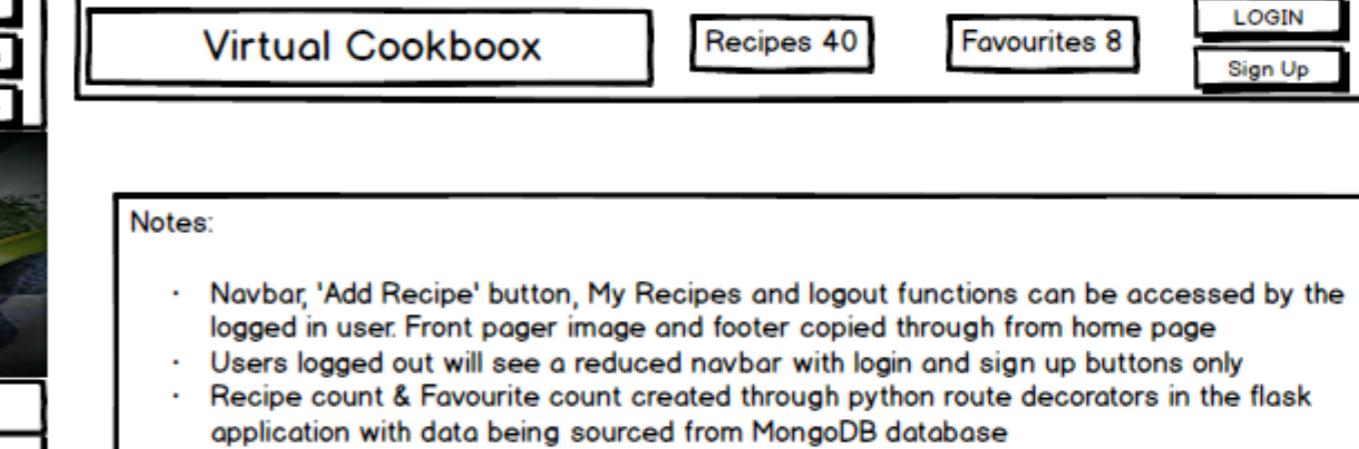

Contact

Hand-drawn style contact information.

Website Designer

Hand-drawn style website designer information.

Navbar is shown when user has not logged in

The screenshot shows the top navigation bar for a logged-out user. It includes a 'Virtual Cookboox' logo, 'Logout' and 'My Recipes' buttons, and 'Login' and 'Sign Up' buttons.

Notes:

- Navbar, 'Add Recipe' button, My Recipes and logout functions can be accessed by the logged in user. Front pager image and footer copied through from home page
- Users logged out will see a reduced navbar with login and sign up buttons only
- Recipe count & Favourite count created through python route decorators in the flask application with data being sourced from MongoDB database
- User will be presented with 6 food genre images.
- Clicking on a food genre image will navigate the User to a dedicated food genre.html page to view available recipes, in summary format
 - Meat
 - Poultry
 - Fish
 - Vegetables
 - Grains
 - Pasta
- Home icon 'Virtual Cookboox' will take the user back to the 'home page', when clicked
- 'Add Recipe' button allows the User to key in new recipe details & upload an image of their chosen meal
- 'About' section sets out the purpose of the 'Virtual Cookboox' website and also includes reference to user stories too

The screenshot shows a mobile view of a recipe detail page. At the top are two buttons: 'Virtual Cookboo' (with a small icon) and 'Add Recipe'. Below is a header section with a background image of various vegetables (peppers, tomatoes, etc.). The main content area starts with a title 'Meat 1' in a central box, surrounded by a large 'X' shape. Below this are two input fields: 'Recipe Name' and 'Brief Description'. A horizontal line follows. Then there are six input fields arranged in two rows of three: 'Author' (checkbox), 'Complexity' (checkbox), 'Prep Time' (checkbox), 'Cook Time' (checkbox), 'Calories' (checkbox), and 'Servings' (checkbox). Another horizontal line follows. Below this is a section titled 'Ingredients' containing four rows of placeholder text. A horizontal line follows. Below this is a section titled 'Instructions' containing four rows of placeholder text. A horizontal line follows. Below this is a section with a single row of placeholder text. At the bottom are three buttons: 'Edit' (yellow), 'Delete' (red), and '< Back' (yellow). A horizontal line follows. Below this is a section titled 'Loaction' containing a single row of placeholder text. A horizontal line follows. Below this is a section titled 'Stay Connected' containing two rows of social media icons: GitHub and LinkedIn. A horizontal line follows. Below this is a section titled 'Contact' containing a single row of placeholder text. A horizontal line follows. At the very bottom is a footer section with the text 'Website Designer'.

Notes:

- Home icon 'Virtual Cookboo' will take the user back to the 'home page', when clicked
 - Navbar, 'Add Recipe' button, front pager image and footer copied through from home page
 - Recipe count & Favourite count information is hidden from the Navbar in mobile view
 - Meat recipe detail screen appears once the User has clicked the 'Recipe Detail' button contained on food genre.html page
 - All recipe details are injected into the recipe.html file from mongodb atlas via python file
- Content of recipe detail page:
- Recipe image of selected meal
 - Recipe Name
 - Brief description of the meal
 - Author name of original recipe
 - Complexity - Easy or Challenging
 - Calories - Integer value (kcal per serving)
 - Prep Time - Integer value to support meal preparation time
 - Cook Time - Integer value to support meal cooking time
 - Servings - Integer value to support number of servings per set recipe
 - Ingredients - Name and quantity of ingredients required to both prepare & complete meal
 - Instructions - Line by line guide on how best to create and present the selected meal
 - 'Edit' & 'Delete' buttons added to allow the User to make modifications to existing recipes. Used only in cases to improve the User experience
 - 'Add Recipe' button allows the User to key in new recipe details & upload an image of their chosen meal

The screenshot displays a meal detail screen with the following components:

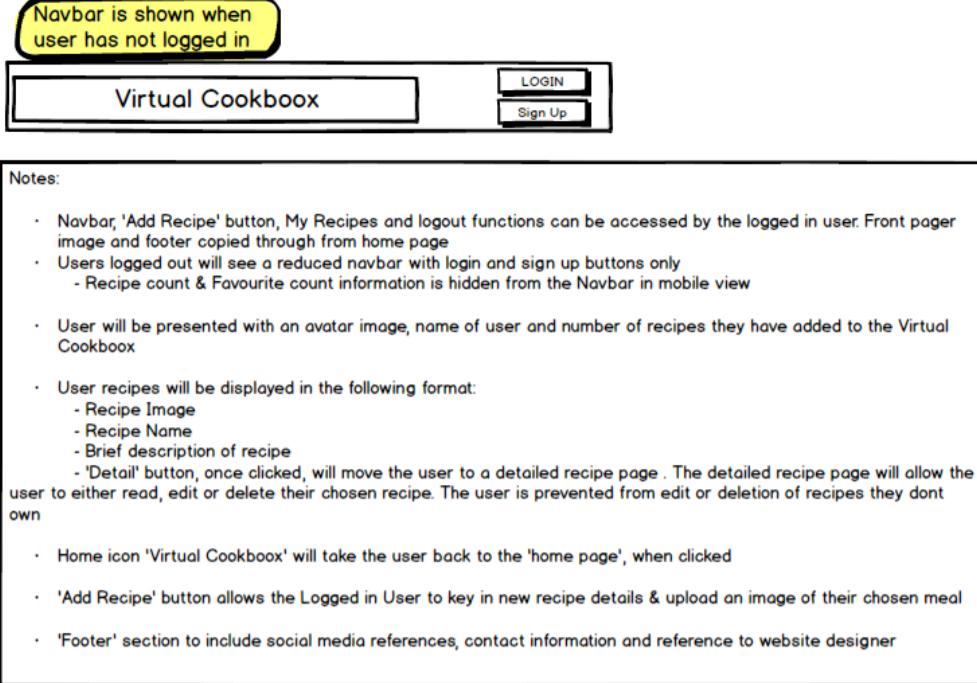

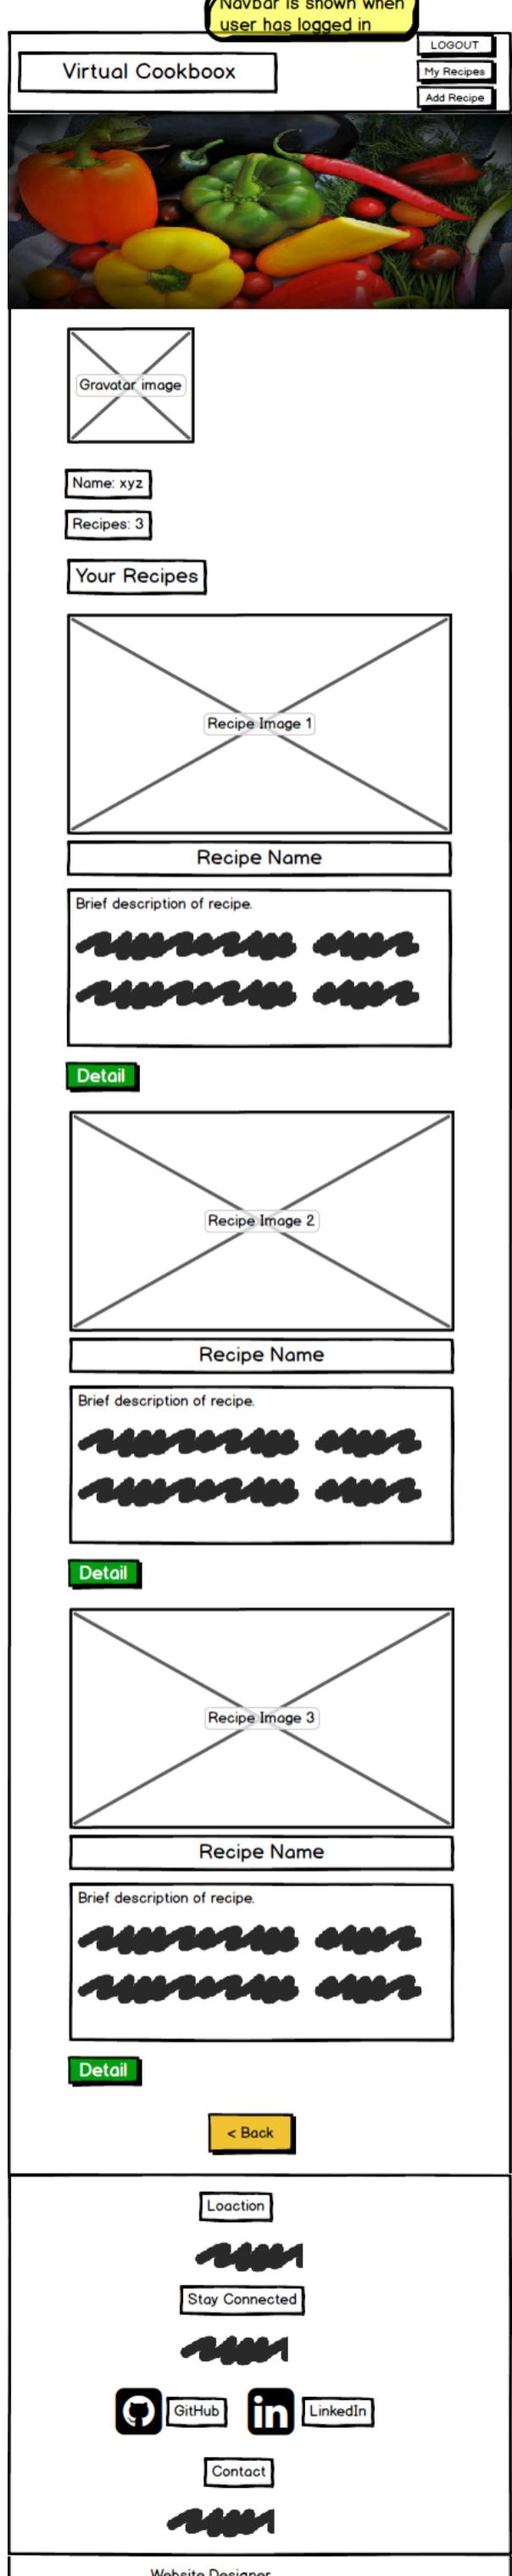

- Header:** Virtual Cookbooxx (Home icon), Recipes 40, Favourites 8, Add Recipe.
- Image:** A vibrant image of various colorful vegetables (tomatoes, bell peppers, carrots, onions) at the top.
- Section 1:** Contains a placeholder image for the selected meal (labeled "Meat 1") and fields for Recipe Name (placeholder "Pasta Carbonara") and Brief Description (placeholder "A classic Italian dish made with pasta, eggs, cheese, and bacon or pancetta").
- Section 2:** Includes input fields for Author (checkbox), Complexity (checkbox), Prep Time (checkbox), Cook Time (checkbox), Calories (checkbox), and Servings (checkbox).
- Section 3:** Placeholder text for Ingredients: "Pasta, eggs, cheese, bacon/pancetta".
- Section 4:** Placeholder text for Instructions: "Cook pasta al dente, sauté bacon/pancetta until crispy, add eggs and cheese to the pasta".
- Buttons:** Edit (yellow button) and Delete (red button) located below the instructions section.
- Navigation:** < Back button at the bottom center.
- Footer:** Links for Location, Stay Connected (Facebook, Instagram, YouTube), Contact, and social media icons for GitHub and LinkedIn.
- Page Bottom:** Website Designer

Notes:

- Home icon 'Virtual Cookbooxx' will take the user back to the 'home page', when clicked
- Navbar, 'Add Recipe' button, front pager image and footer copied through from home page
- Recipe count & Favourite count created through python route decorators in the flask application with data being sourced from MongoDB database
- Meat recipe detail screen appears once the User has clicked the 'Recipe Detail' button contained on food genre.html page
- All recipe details are injected into the recipe.html file from mongodb atlas via python file

Content of recipe detail page:

- Recipe image of selected meal (M5 responsiveness)
- Recipe Name (M7 responsiveness)
- Brief description of the meal (M7 responsiveness)
- Author name of original recipe
- Complexity - Easy or Challenging
- Calories - Integer value (kcal per serving)
- Prep Time - Integer value to support meal preparation time
- Cook Time - Integer value to support meal cooking time
- Servings - Integer value to support number of servings per set recipe
- Ingredients - Name and quantity of ingredients required to both prepare & complete meal
- Instructions - Line by line guide on how best to create and present the selected meal
- 'Edit' & 'Delete' buttons added to allow the User to make modifications to existing recipes. Used only in cases to improve the User experience
